

# Mushrooms

Ina Ding

## Introduction

This section includes an introduction to the project motivation, data, and research question.

The research question and motivation are clearly stated in the introduction, including citations.

The primary goal of this project is to best predict whether or not a mushroom is poisonous depending on various physical attributes, rarity, and habitat of the fungus.

*Citations* Mushroom. (1987). UCI Machine Learning Repository. <https://doi.org/10.24432/C5959T>.
